

WIRELESS OPTICAL MOUSE

Synchronization
Switch

Instructions:

1. Remove the mouse from the package and insert batteries into the battery compartment (Diagram 1).
The red optical sensor (Diagram 1) will light up when batteries are correctly installed.
2. Plug the charging cradle into the computer's USB port. When the computer is turned on, the red power indicator (Diagram 2) will light up. Press the synchronization button (Diagram 2) on the charging cradle and then the synchronization switch on the underside of the mouse (Diagram 1). The mouse is ready for use when the synchronization indicator flashes quickly.

Product Details:

The mouse enters Sleep Mode 1 when unused for five seconds. To reactivate, simply move the device. When unused for 10 minutes, the mouse enters into Sleep Mode 2. Press one of the buttons on the mouse to reactivate. To save power, press the left and right mouse buttons simultaneously to activate the Sleep Mode 2.

If the Blue LED Low voltage Indicator light on the scroll wheel flash, this indicates battery low, you should charge the batteries.

Put the mouse into the charger when The power indicator besides the scroll wheel is glowing with blue light ,it indicates that the power has been connected .Meanwhile, the charging indicator under the scroll wheel is glowing with red light ,which means it has gone into "charging" status

When finishing charging ,charging indicator will shut off automatically .(note: if the power indicator didn't glow, please re-insert the mouse into the charging cradle)

Warning: Never use alkaline batteries with the mouse
