INSTALLATION

Window XP/Vista/7/8/8.1/10, Mac9.1 or above

1. Turn your computer on and wait until the system has finished booting
2. Connect your computer to USB hub using the enclosed USB cable.
3. Connect the USB plug to your computer
4. Connect the USB plugs on the peripheral devices (Printer, scanner...etc.) to the USB hub.

Note: If wrongly installed or improperly used in the living area, the device can cause interference in radios and other electronic devices. Appropriate use is when the device, as far as feasible, is operated with shielded connection cables (with network products in addition to category 5 shielded cables and higher). The device has been tested and falls within the limits of class B computing equipment according to the requirements of EN 55022.

Warning: This device conforms with test category B - it can cause radio interference in the living area; in this case the operator may demand that appropriate measures are implemented and arise for this reason. Declaration of conformity: The device fulfills the EMV requirements according to EN 55022 for ITE and EN 55024. Devices with external or integrated power supply furthermore fulfill the requirements of EN 61000-3-2 and EN 61000-3-3. In this way, the fundamental protection requirements of the EMV-2014/30/EU guideline are fulfilled. The CE conformity has been proven. The pertinent declarations are deposited with the manufacturer.
