

# USB 3.0 3 IN 1 COMBO ADAPTER

Quick Installation Guide  
DA-70835

## Specification

- **3 in 1 Combo Adapter:**  
Input - USB 3.0

Port	Usage
VGA x 1	USB 3.0
LAN x 1	Fast Ethernet (10/100M)
USB 2.0 x 1	USB Port

## Driver Install

Install a driver into your computer:

### **Windows OS: VGA, LAN**

- **Step 1:** Find a CD on your package and put this CD into your computer.
- **Step 2:** You will see a folder

Click it and you will see the following:

Please kindly double click  
“**Windows OS.exe**” to start the  
installation.

When the installation is finished, it will disappear automatically.

## MAC OS: LAN

- **Step 1:** Find a CD on your package and put this CD into your computer.
- **Step 2:** You will see a folder

Click it and you will see the following:

Please kindly double click “MAC OS 10.7~10.9.pkg” to start the installation.

When the installation is finished, it will disappear automatically.

**\*\*Original Driver:** You could also install manually and execute the driver on each folder.

## Notice of VGA port:

### ▲ **Hardware Requirement:**

Chipset supports GEN2 or above.

### ▲ **VGA Resolution:**

Connected to USB 3.0 → up to 1080p

Connected to USB 2.0 → 800 x 600 only

### 1. **Flicker:**

You might see flickers on your monitor. Do not worry about it! This is because of the bandwidth issue. You could adjust your computer’s monitor to the lower resolution or stop other devices on this combo adapter.

### 2. **No Display:**

If there is no display to a connected monitor / projector / TV, you could adjust your computer’s monitor to the lower resolution.

**\*\*Please kindly refer to details on page 6 of user manual.**

## USB 2.0 Hub:

Plug and Play

### **\*Notice of USB port:**

**Provides Bus Power 500mA**
