## 2. Description of Functions

DN-70310 is a highly integrated all-in-one receiver, featuring instant and direct peer-to-peer connection with no need to press switch button between different functions.

**Mirroring:** Screen mirroring from Android smart phones, or tablet PCs through Wireless Mirroring technology.

**ScreenShare:** Mirror your screen from PCs or notebooks for meeting room application after installing ScreenShare software on the PCs or notebooks (supporting Windows and Mac OS)

**Airfun:** Stream photo/music/video from your PC, smart phone or laptop using Airfun APPs.

**i-Play:** Stream photo/video from your iPhone or iPad.

### 2.1 How to Setup Mirroring

#### **Mirroring from Android devices to bigger screen**

The setup location of Mirroring connection may be different between different brands of smartphone and tablet PC.

The setup page is usually in "Wi-Fi" => "More setting" or in "Display setting".

The name normally is called "Screen Mirror", "Cast Screen", etc.

Below are the connection guides for some popular brands of Android smartphones.

**Type1:** Please go to “Settings” -> “More settings”=> “Allshare cast”.

Turn “on” AllShare Cast . Your phone will scan the streaming box, and it will show the SSID of the box. Choose the SSID which you find on the TV, and your phone will connect to the box automatically and begin screen mirroring.

**Type2:** Please go to “Settings” -> “Xperia” => “Screen mirroring” => “Turn on Screen mirroring”.

Your phone will scan the streaming box, and it will show the SSID of the box.

Choose the SSID, mirroring will begin while your phone connect to streaming box successfully.

**Type3:** Please choose “Settings” -> “Media Output”.

The phone will automatically scan the streaming box, and show the SSID.

Choose the SSID which you find on the TV, and your phone will connect to the box automatically.

Mirroring will begin while your phone is connecting to streaming box successfully.

## 2.2 How to Setup ScreenShare

### PC to TV mirroring

Please install ScreenShare software from the CD onto the PCs or Notebooks.  
The ScreenShare software will support both Windows and Mac OS.

After installation the software, search and find the device's SSID (DN-70310) in the wireless list on your PC/notebook.

Connect to this device SSID and double click the ScreenShare icon from your desktop. ScreenShare will auto detect 'Server IP', please input login code as shown on instruction page.

If login code is correct, application software will appear.

## Main functions

No	Name	Function Description
1	Play	Press “Play” to start the mirroring. Start / pause presentation. When pausing a progressing presentation, the displaying image will freeze.
2	Stop	Stop a progressing presentation and go back to instruction page.
3	Menu	Access menu list.
4	Login code	Show the application login code.
5	Volume	Control the slide-bar to change the volume. Press the icon to mute.
6	Information/Minimize/Close	Minimize and close the Application Software window. Information can show the application information.

## 2.3 How to Setup Airfun for media sharing

### Airfun Media Streaming

1. Please scan the QR code on the screen or go to the Google play/APP store to download AirFun APP.
2. Then connect to DN-70310 on your Wi-Fi list from your smart devices.

3. Press the Airfun icon on your screen.
4. The Airfun APP will start to search for any devices that support Airfun media sharing. Please select DN-70310 from the available device list.

5. Select this icon to choose the file type which you want to share and present on the HDMI screen.

### 2.3.1 Basic Usage of AIRFUN Utility for Windows software

1. You can install Airfun application in the CD ROM.
2. Double click the AIRFUN icon from your desktop.

3. The Airfun will start to search device.

4. Then you should be able to see your PC screen on the TV now.

5. You can drag the video/photo/music file to Airfun main menu directly. For video files, please drag files to the right folder.

6. For photo/music files, please drag files to the left folder.

## 2.4 How to Setup i-Play for iPhone/iPad

**i-Play**

1. Please search and connect the device's SSID (DN-70310) on wireless list on your iPhone/iPad first.
2. Choose the photos or videos which you want to share.
3. Press the "Airplay" to show the device list. Select your receiver box, and the file will be shown on the bigger display such as the HDMI TV or monitor.

Press the "Airplay" to show the device list. Select DN-70310 as your receiver box, and the photo/video will be shown directly on the HDMI screen.
