## Connect to Wireless Access Point

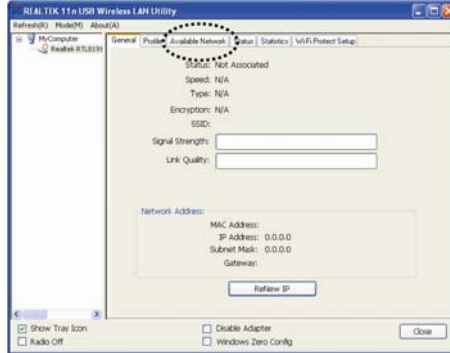

Using Configuration Utility to Connect to Wireless Access Point:

1. After installation is complete, wireless configuration utility will be shown in the desktop of your computer automatically. You will also see an icon at the lower-right corner of your windows system. You can click the icon by right mouse key, and select the configuration utility you want to use.

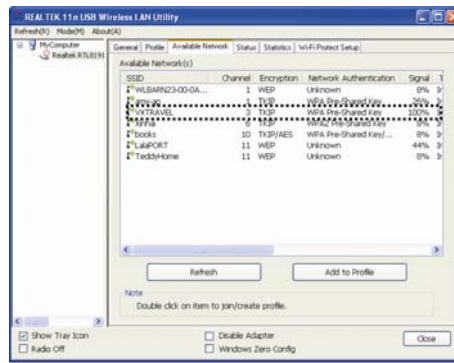

**HERE!**

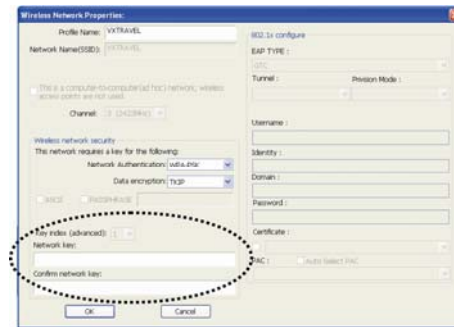

2. Wireless utility will appear. Click 'Available Network' tab to search for wireless access points nearby.

3. Please wait for a while, and all wireless access points which can be reached by this wireless network card will be displayed here. Please select the access point you want to connect, and then double click on it or click 'Add to Profile'.  
If the wireless access point you want to connect does not show here, please click 'Rescan'.

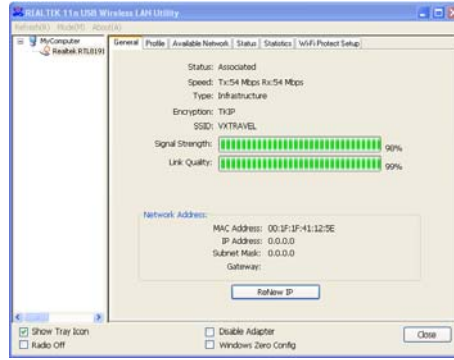

4. If a password (a.k.a. 'Network Key') is required to access the wireless access point, please input it in 'Network key' (and input it again in 'Confirm network key' for confirmation). Click 'OK' when password is properly inputted.

- The network card will attempt to connect to access point now, this may require few seconds to minutes, please be patient. When the 'Status' become 'Associated' in 'General' tab, your computer is connected to access point you selected. Click 'Close' to close configuration menu.

For advanced settings and other features of this USB wireless network card, please refer to user manual enclosed in supplied CD-ROM.
