Package Contents

Before you starting to use this router, please check if there's anything missing in the package, and contact your dealer of purchase to claim for missing items:

□ Broadband router (main body, 1 pcs)

 \Box Quick installation guide (1 pcs)

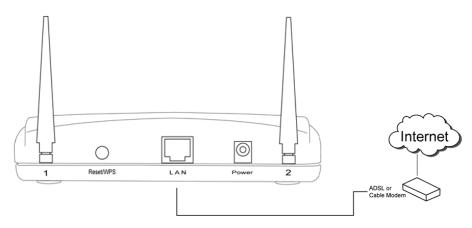

□ User manual CD-ROM (1 pcs)

 \Box A/C power adapter (1 pcs)

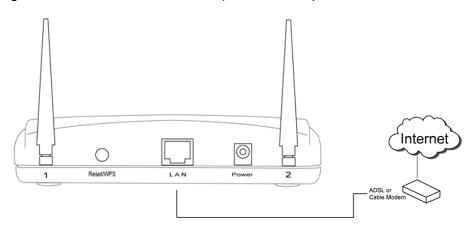

Build Network Connections

Please follow the following instructions to setup wireless router:

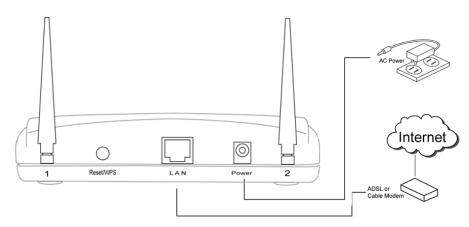

1. Connect your xDSL / cable modem to the WAN port of router by Ethernet cable.

2. Connect all your computers, network devices (network-enabled consumer devices other than computers, like game console, or switch / hub) to the LAN port of the router.

3. Connect the A/C power adapter to the wall socket, and then connect it to the 'Power' socket of the router.

Please check all LEDs on the front panel. 'PWR' LED should be steadily on, WAN and LAN LEDs should be on if the computer / network device connected to the respective port of the router is powered on and correctly connected.

If 'PWR' LED is still off and you're sure that all cable connections are connected properly, please contact your dealer of purchase for assistance.

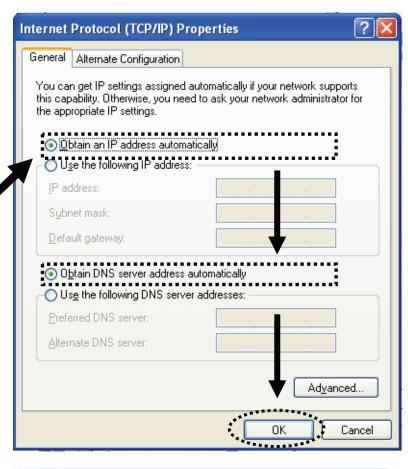

Network Setup

Please use the web browser to configure the wireless router. A computer with wired Ethernet connection to the wireless router is required for this first-time configuration.

8. Select time zone of the area where you live, then click 'Next'.

Broadband Type

Specify the WAN connection type required by your Internet Service Provider. Specify a Cable modern, Fixed-IP xDSL, PPPoE xDSL or PPTP xDSL connection.

O Cable Modem

A connection through a cable modem requires minimal configuration. When you set up an account with your Cable provider, the Cable provider and your Broadband router will automatically establish a connection, so you probably do not need to enter anything more.

O Fixed-IP xDSL

Some xDSL Internet Service Providers may assign a Fixed IP Address for your Broadband router. If you have been provided with this information, choose this option and enter the assigned IP Address, Subnet Mask, Gateway IP Address and DNS IP Address for your Broadband router.

O PPPoE xDSL

If you connect to the Internet using an xDSL Modern and your ISP has provided you with a Password and a Service Name, then your ISP uses PPPoE to establish a connection. You must choose this option and enter the required information.

O PPTP xDSL

If you connect to the Internet using an xDSL Modem and your ISP has provided you with a Password, Local IP Address, Remote IP Address and a Connection ID, then your ISP uses PPTP to establish a connection. You must choose this option and enter the required information.

Fixed-IP xDSL

Save setting successfully!

Apply

OK!

Enter the IP Address, Subnet Mask, Gateway IP Address and DNS IP Address provided to you by your ISP in the appropriate fields.

IP address assigned by your Service Provider :	172.1.1.1		
Subnet Mask :	255.255.0.0		
DNS address :			
Service Provider Gateway Address :	172.1.1.254		
	Bac	<][OK

Please press APPLY button to restart the system for changes to take effect.

System Restarting! Please wait for a while !

9. Select a broadband type of the Internet connection you're using, then click 'Next'.

10. Please input the Internet connection parameters, you should use the value provided by your Internet service provider.

Click 'OK' when you finish.

(The content of this page will vary depends on the connection method you selected in step 9)

11. Click 'Apply'.

12. When you see this message, the router will be ready with new settings within 30 seconds.

13. Please use your computer to connect to any website on Internet, or start any Internet application and see if they're working properly.

For instructions of advanced settings and wireless network setup, please refer to user manual in supplied CD-ROM.
