Product Overview

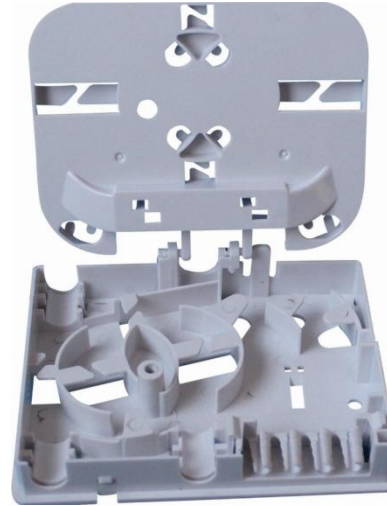

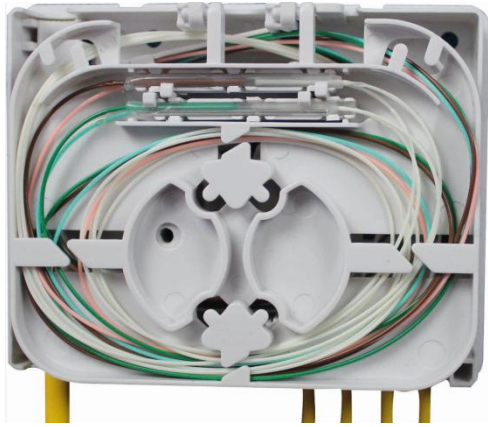

The item "DN-931090" from DIGITUS[®] Professional is a small size termination box which allows breaking out fibers from a riser cable to an individual drop cable that brings the fiber from this point to the final point. It is designed for riser cables that allow access through a small window cut or incision.

Delivery Content

- Base module for main cable management
- Splice module
- Cover
- Main- and drop cable fixation accessories
