

4K HDMI Splitter, 1x8

Quick Installation Guide
DS-55338

1. Introduction

The DIGITUS® HDMI Splitter splits your HDMI device's audio and video signals on 8 TVs, monitors or projectors with a resolution of UHD 4K / 60 Hz. Via EDID management, you can choose from 3 modes (Copy, Auto, Downscaler). The integrated Downscaler supports the display of 4K contents on Full HD displays. Additionally, 4K as well as Full HD displays can be operated simultaneously. Thanks to its Auto-EDID function, the splitter automatically recognizes the connected displays - no manual settings required.

2. Main Features

7. Troubleshooting

Problems	Causes	Solutions
Power light is off and product is not working	No power supply connected	Please connect the power supply
No signal output on the screen	The HDMI cable may not comply with the HDMI 2.0 specification or is maybe too long	Please use at least a High Speed HDMI 2.0 cable that does not exceed the maximum length of the input/output cable of 5 m for 4K/60Hz (4:4:4) or 10 m for 4K@30Hz / 1080p
No picture out only sound out or output pink screen	Maybe the displays can't support the resolution or the HDCP	Change a lower resolution of the input HDMI signal to check

		whether this issue or not; if not, maybe the customer should change a non-HDCP input source or HDCP compliant displays or devices
No picture out to a FHD TV when connecting a 4K@60Hz source, and have normal picture to the 4K HDR supported TV at the same time	Maybe the downscaler function can't support the input signal, such as 4K@60Hz 4:2:2 HDR signal (Dolby Vision) or when connect one FHD TV with a fixed 4K@60Hz output device	The downscaler function only support the 4K@60Hz 4:4:4 and 4:2:0(HDR 10) signal downscaler to 1080p signal, or there will be no picture output to the FHD TV, the customer need change a supported downscaler signal input
