

**Full Metal USB Car Charger,  
2 Ports, Unibody**

**Manual  
84120**

## **SPECIFICATIONS:**

- Input voltages: 10.5 - 18V DC
- USB output voltage: 2x 5V/ 2.4A
- Total USB output current: 4.8A max
- USB ports: 2 x 2.4A

USB car charger for charging most of electronic devices with an USB port as like all smartphones, tablets, MP3 players, cameras, iPhone<sup>®</sup>, iPad<sup>®</sup> etc.

- 84120 has a fuse and short circuit protection
- Safety life hammer function, in case of emergency you can use the charger/the peak to crash vehicle windows

## **HOW TO USE:**

- Plug the USB metal car charger 84120 into the cigarette lighter port or the vehicle's power outlet.
- The power indicator of 84120 will be lightened up
- Plug the USB cable of music player or devices what you wanted to charge into the charger

## **FEATURES:**

- Certification: CE
- With RoHS Directive-compliant
- Top-vehicle charging technology, easy to charge for all of the 3C digital devices
- Alloy material: High-quality metal alloy design, extraordinary temperament

- Intelligent Multi-circuit protection system to adapt to the complex automotive supply environment
- Ultra-high-power output to meet the changing requirements of high-power
- device

### **WORKING ENVIRONMENTAL:**

- Operating temperature: -20°C to 50°C (Full load and normal operation)
- Storage temperature: -30°C to 85°C with package
- Operating humidity: 5% to 90% RH
- (72Hrs. Full load and normal operation)

### **PROTECTIONS:**

- Over-voltage protection
- Over-current protection
- Short-circuit protection

### **IMPORTANT:**

- Please note that 84120 is not self-powered
- Power is supplied by the car connected via pole

### **SAFETY INSTRUCTIONS:**

- Do not use the device in the wet environment
- Do not expose the device to moisture
- The appropriate temperature to use the device is 0°C to 45°C
- Keep away from Children
- Avoid excessive heat sources or prolonged direct sunlight
- This device is not user serviceable
- Should the device stop working or you suspect a malfunction, discontinue using the device immediately
- To pull out the device when you finish using

Note: If wrongly installed or improperly used in the living area, the device can cause interference in radios and other electronic devices. Appropriate use is when the device, as far as feasible, is operated with shielded connection cables (with network products in addition to category 5 shielded cables and higher). The device has been tested and falls within the limits of class B computing equipment according to the requirements of EN 55022.

Warning: This device conforms with test category B - it can cause radio interference in the living area; in this case the operator may demand that appropriate measures are implemented and arise for this reason. Declaration of conformity: The device fulfills the EMV requirements according to EN 55022 for ITE and EN 55024. Devices with external or integrated power supply furthermore fulfill the requirements of EN 61000-3-2 and EN 61000-3-3. In this way, the fundamental protection requirements of the EMV-2004/108/EC guideline are fulfilled. The CE conformity has been proven. The pertinent declarations are deposited with the manufacturer.
