

Dual Card Reader Hub USB-C™ / USB 3.0, OTG

Quick Installation Guide
DA-70886

Product introduction

The DIGITUS® Dual Card Reader with an integrated SUSB hub (OTG) can either be connected to your smartphone, tablet or notebook. This allows you to access inserted storage media such as USB sticks, SD or MicroSD memory cards. You can connect the device via the hub's USB A (USB 3.0) or the USB-C™ plug. The USB hub and the memory card reader can be used simultaneously. This allows you to move or copy files between both ports. Thanks to Plug and Play, there is no need for any driver or app installations. Perfect e.g. to back up your holiday pictures directly on-site, eliminating the need for a notebook.

Note:

Only one card reader can be used at a time.
Smartphones / tablets must support OTG.

Structure Diagram

1	USB 3.0 connections
2	SD/ Micro SD slots
3	USB Type-C™ connection
