V. Driver Installation

a. Under Windows 7/8/10/Vista/XP/2000: no need driver

Under system Windows 7/8/10/Vista/XP/2000, system will automatically detect the new hardware and finish the setup! Then an  icon will appear on the right-bottom area of the system toolbar as below:

Congratulations to enjoy this product now!

b. Setup mode under Mac OS system

If your system is Mac OS 10.4 or above, the system can detect the hardware and install it directly, if your system is Mac OS8.6, you have to download setup "USB Mass Storage Support 1.3.5" from Software Support.

Website: <http://www.apple.com/support>

VI. Power Supply

Usually under USB mode bus-power can support hardware work normally, If your HDD needs more than 500mA to function or it works unstably while using only the USB Bus-power, you should apply the external power supply to this unit:

Connect the USB extended power jack:

1. Connect the HDD installed enclosure to your computer's USB/FW port with the USB2.0 multiple/FW cable
2. Connect the red color of USB extended power jack which been mounted on the enclosed USB2.0 multiple cable to your computer's the other USB port

VII. Remove the external enclosure

Before removing this unit from your computer, please finish the following procedures for a safe removal:

- 1). Click the  icon in the **[Desktop]** window of your computer
- 2). A **[Safely Remove Hardware]** message window will appear, click the **[Stop]** button
- 3). **[It is now safe to remove the USB device]** message will appear, close the [Safely Remove Hardware] window
- 4). Remove (Power off) the USB extended power jack if it is applied.

Now you can safely remove the enclosure!

VIII. Format a new Hard Disk Drive

If you use a new Hard Disk Drive, you must format it before you use it, please follow the steps as bellow to format your new Hard Disk Drive:

- 1). Right click [My Computer], and select **[Manager]**
- 2). System will display a "Computer Manager" window, and click **[Disk Manager]** in left window
- 3). In right window, the message of the new Hard Disk Drive will appear under the system disk, such as [Seagate...]
- 4). Right click the new disk drive, and select **[Delete partition]**
- 5). Right click the new disk drive, select **[New Partition]**
- 6). Right click the new disk drive, select **[New logical drive]**
- 7). Right click the new disk drive, select **[Format disk drive]**
- 8). Now you have formatted the new disk drive, then in **[My Computer]**, the new Hard Disk Drive will appear and you can use it.
