FAQ

Q1: Does the sharing switch support USB 1.1 and 2.0 devices?

A: The sharing switch can work and comply with USB 1.1 and 2.0.

Q2: Does the sharing switch need power supply?

A: No, the sharing switch is designed for non-powered switch. It shares with computer power when you connect to the computer.

Q3: What operating system will the sharing switch work with?

A: The sharing switch can support Windows 7, 8, 10, Vista, XP, 2000 and Mac OS x (10.3 and higher).

TROUBLESHOOTING

1. The switching function does not detect my computer.
 - make sure that the cable between the sharing switch and the computer is completely connected
 - Try to connect the computer to a different USB port
2. The USB device is not working properly.
 - Please unplug and plug-in again to activate the device
