# Digitus IPcam Viewer Quick Installation Guide (Android)

Digitus IPcam Viewer is the APP for Mobile devices to connect to Digitus IP Cameras (DN-16026 & DN-16035) to have live-view anytime anywhere.

This APP is available at Google Play.

How to Setup:

1. For Android phones or Tablet PC, please go to Google Play

2. Search for "Digitus IPcam Viewer"

3. You will find Digitus Camera Viewer with icon

4. Download the APP from Google Play

5. Execute the APP on your mobile devices

6. If the cameras are in the same LAN of the mobile devices, then press "Add". The APP will auto-scan and add the cameras.

7. If the cameras are connected to the Internet, then you can manually key in the IP addresses and port number.

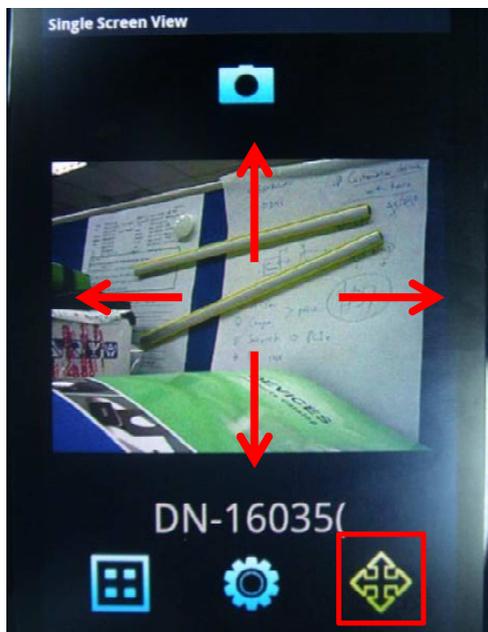

Example:
The IP address: 60.250.182.254
Port: 6001
User name: admin
Password: 1234

8. For DN-16035 (Pan & Tilt camera), you can control the P & T through smart phone access as well.

Press the [icon] icon and move the viewing direction by sliding on the screen of the mobile device.
