

Potential Equalization Bars

✓ easy installation in racks

✓ incl. earthing wires

✓ short or long version available

✓ necessary mounting parts included

Abstract

Potential equalization bars, incl. earthing wires and mounting material

Features

- copper busbar
- incl. 4x earthing wires (diameter 4 mm, 40 cm length) and mounting material

Product Overview

The potential equalization bars can be easily mounted to the profile rails of your rack in order to connect your necessary components. There are two versions available: The short version (220 mm length) has a total of six connection points. The long version is a set consisting of two 820 mm long bars with each 24 connection points (48 in total) which also includes a short earthing wire to connect both bars.
