Wall Mounting Dynamic-N Cabinets

Manual

Note: All illustrations and diagrams are for reference only. The manufacturer reserves the right to make design and visual changes that do not affect the functionality of the product.

Assembly of the bottom panel and top cover (roof) with front and rear structural frames.

It is recommended to first screw the front and rear frames to the bottom panel. The final tightening of the screws should be done after the roof cover has been installed.

Installation of 4 mounting profiles for 19" accessories.

Before installing the profiles, plan their spacing from the front door and rear panel. This depends on the dimensions of the devices and accessories installed in the cabinet.

Installation of side panels, side panel hooks and front door hinges.

IV

Installation of a lock in the front doors and glass doors in the front frame.

Two sets of keys for the front doors are included in the set.

Wall bracket installation.
