DN-39004	Grey (RAL 7035)	1678 x 600 x 670 mm	1780 x 620 x 795 mm	95.6 kg / 98.6 kg

Product Overview

The mobile workstations with integrated network cabinet from DIGITUS® are made primarily to serve as a mobile workstation e.g. in the office area, warehouses, hospitals, laboratories, hotels or conference rooms, etc. Each cabinet is separated into three units. The lockable screen box is used to store a monitor or similar. It can be even equipped with 482.6 mm (19") devices. A lockable keyboard box ensures a safe storage of your input devices when not in use and with holes on both sides it can be used with connected devices when locked for daily work. The base of the workstation cabinet is the 482.6 mm (19") cabinet which is already equipped with two shelves (fixed and extendible type). You can store your printer or various other accessories inside. Furthermore, every workstation cabinet is outfitted with a folding table for convenient daily usage. Each cabinet consists of up to 1.5 mm strong steel sheet material which ensures a very good stability as a robust steel construction due to special plate curving technique. The color is created by powder coating in grey (RAL 7035). An impact resistant rugged frame in yellow color safes the cabinet against damage. An extensive portfolio of accessories for cable management, shelves, etc. will help to meet many requirements in daily use.
