## Chapter 1 Introduction

Congratulations on your purchase of this 10/100Mbps switch. Instructions for installing and configuring this product can be found in this manual. Before you install and use this product, please read this manual carefully for full exploiting the functions of this product.

## Chapter 2 Installation

### 2.1 Front Panel LEDs

#### Power LED

This indicator illuminates when the Switch is receiving power.

#### Link/Act (1- 16)

This indicator illuminates steadily when a port is connected to a station successfully, If indicator is blinking, it indicates that a port is transmitting or receiving data on the network.

### 2.2 Back Panel and Side Panel Features

The network ports and the power port are located on the back panel of the switch.

#### 1-16

These ports are connection points for PCs and other network devices, such as additional switches.

#### Power

The power port is where you will connect the included power adapter.

### 2.3 Connecting Network Devices

To connect network devices to the Switch, follow these instructions.

1. Make sure all the devices you will connect to the Switch are powered off .
2. Connect a Category 5 Ethernet network cable to one of the numbered ports on the Switch.
3. Connect the other end to a PC or other network devices.
4. Repeat steps 2 and 3 to connect additional devices.
5. Connect the supplied power adapter to the power port on the Switch's back panel.

**Note: Make sure you use the power adapter included with the Switch. Using a different power adapter may result in damage to the Switch.**

6. Plug the other end of the adapter into an electrical outlet.
7. Power on the devices connected to the Switch. Each active port's corresponding LED will light up on the Switch.
