SPECIFICATIONS:
- USB Interface

INSTALLATION:

For All Operating Systems

NOTE: The pictures shown in this User's Manual are for demonstration purposes only. Your computer or product may look slightly different.

NOTE: If you are connecting more than one USB device to your USB Hub at the same time, it is recommended that you use the enclosed Power Adapter with your USB Hub in order to provide enough power for the USB devices connected to your USB Hub.

- Plug the enclosed Power Adapter to an available power outlet.
- Connect the Power Adapter to your USB Hub. Turn on your USB Hub; the LED Indicator on your hub will illuminate to show it is powered.

LED Indicator

Power Switch

- Turn on your computer.

- Plug the USB connector of your hub into an available USB port on your computer.
- Your computer will detect and install the necessary drivers automatically.
- Your new hub is now ready to be used.

SAFELY REMOVING USB DEVICES:
To prevent any loss of data and/or hardware damage you must safely remove your USB device from your computer, please follow the instructions below:

NOTE: The screen shots below are captured under Windows® XP, your screen may look different but with same options depending on the Windows® XP, Windows® Vista, Windows® 7 and Windows® 8/8.1 operating system you use.

- Make sure your USB storage device is not in use and there's no activity between your computer and your USB device.
- Click the "**Safely Remove Hardware**" icon in the system tray on your desktop.

- Select the USB storage device that you want to remove from the list.

- After a few second, a message will appear notifying you that it is now safe to remove your USB device from your computer.

- Now you can safely disconnect your USB storage device from your computer.
